MANAGE INVENTORY

- Take control of on-hand supplies, including branch and car stock.
- Order and dispense supplies using laptops, touchscreen tablets, and smart phones.
- Cloud-based application works on- and offline.

CONTROL COSTS

- Set controls based on formulary/non-formulary, spend ceilings, inventory and utilization settings, and more.
- Built in approval process with email alerts.

TRACK & ANALYZE SPEND

- Securely connect to your EHR to update patient information and order products*.
- Track supplies by patient, staff, branch, product category, and more.
- Eliminate redundancy and errors.

**Subject to specific EHR system limitations and capabilities*
